ABOUT THE PROJECT

```
README.md
```

UTF-8 Markdown

MY FIRST PORTFOLIO is a personal portfolio website and the first project built through vibe coding. It gives a visitor one simple place to learn about the creator and see the work they have done, instead of searching through scattered links and repositories. The site is written with HTML and Python and is published live on GitHub Pages, so anyone can open it in a browser without installing anything. The page is organised as a clean personal showcase, with the creator's introduction and projects presented in a clear, readable layout. It was improvised and refined step by step, and it marks the starting point of the creator's coding journey.

LANGUAGES / TECH USED

● HTML● PYTHON

REPOSITORY LINK

```
$ git clone https://github.com/yashraj-personal
