ABOUT THE PROJECT

README .md UTF-8 Markdown

CAM SCAM Prototype is a fully coded demonstration website that shows how some apps can collect personal data without people noticing. It is built as an awareness project and works as a library of linked pages, so users can see the idea in one place. The main page, named THE HUB, is a dashboard with seven modules: Cloud Image, Shopping, Album, Good Morning, Good Night, Quiz Demo and Tech Login. Each module opens as its own page, and the hub shows a clear status panel on the front screen.
