## ABOUT THE PROJECT

README.md

UTF-8 Markdown

MY SECOND VIBECODED PORTFOLIO is a personal portfolio website made in 2026. It is the second version of my online portfolio, built with HTML and Python in a vibe-coding style, where ideas are described and improved step by step with AI help. The project solves a simple problem: having one clear place on the web that represents my work, instead of scattered files and links. Main points: a personal portfolio page built with HTML, Python used as part of the build, a live public version hosted on GitHub Pages, and my GitHub profile linked as the code source.
