ABOUT THE PROJECT

README.md

UTF-8 Markdown

TEACHERS DAY PROJECT is a personal website made in 2026 to wish teachers a happy Teachers' Day. It is built with HTML and Python in a vibe-coding style, where ideas are described and improved step by step with AI help. The project solves a simple problem: finding a thoughtful way to thank teachers online. Main points: a website made especially for teachers, a Teachers' Day greeting as its main message, a live public version hosted on GitHub Pages, and my GitHub profile linked as the code source.
