ABOUT THE PROJECT

README.md

UTF-8 Markdown

11LABS Teardown is a vibe-coded website built for a competition. It presents a product teardown of ElevenLabs, the AI audio infrastructure company, and makes a complex product easy to understand by breaking it into clear sections. Main features: the core problem ElevenLabs solves, its key user segments, the differentiators that set it apart, the success metrics a product manager would track, and the biggest risks it faces. An About the Analyst section is included. The site is live on GitHub Pages and built with HTML and Python.
