README .md

UTF-8 Markdown

AIML Revesion is a personal revision website built for the Mid Module 2 evaluation in Artificial Intelligence and Advanced Machine Learning. It was vibe coded with AI to turn a full syllabus into one clear field guide, solving the problem of scattered notes before exams. The site covers nine modules, from imbalanced data and feature engineering to decision trees, random forests and gradient boosting. Main features include LaTeX derivations with production-level code, flip-to-reveal interview cards, auto-graded micro-quizzes, and a fully solved 20-question bank.
