EDUCATION

2025 - 2027 | In Progress
CLASS 12TH — PCM +
COMPUTER SCIENCE (CBSE)

2025 | [SCORED 89%]
SECONDARY SCHOOL (CBSE)

SKILLS

- Cybersecurity
- Web Development
- UI Design
- Linux
- Leadership
- Effective Communication
- Critical Thinking

PROGRAMMING LANGUAGES

- Programming Languages: Python, C++, SQL
- Frameworks & Libraries: NumPy, Pandas, Scikit-Learn
- Tools & Environments: VS Code, Google Colab, Git

LANGUAGES

- Hindi ●●●●●
- English ●●●●●

YASH RAJ

CYBERSECURITY ENTHUSIAST

OBJECTIVE

Motivated Class 12 student (PCM + Computer Science) with hands-on experience in cybersecurity, web development, and Python. Built a real-world AI-powered Aadhaar data prediction model selected at UIDAI Hackathon 2026. Seeking an internship to apply technical skills and contribute meaningfully to a professional team.

CERTIFICATIONS

- ☐ **Certification in Artificial Intelligence and Machine Learning** 2026 - PRESENT
[Vishlesan i-Hub, IIT - Patna]
- ☐ **Foundations of Cybersecurity —** 2024 - 2025
[Google / Coursera]

PROJECTS

Government Aadhaar Data Prediction Model [2026]

— UIDAI Hackathon 2026 • AI / Data Science

- Designed and developed a machine learning model to predict patterns in government Aadhaar data.
- Built data preprocessing pipelines and a clean interface for result visualization using Python and HTML.
- Successfully cleared the selection round at UIDAI Hackathon 2026.
- Disqualified from the final round due to the 18+ age restriction — not on technical merit.

Mobile Privacy & Security Analysis Model [2026]

— Cybersecurity / Mobile Security Engineering

- Engineered a security proof-of-concept demonstrating how malicious applications can bypass standard permission prompts to access device storage, photos, and video feeds.
- Analyzed background permission vulnerabilities and data-harvesting mechanisms utilized by unauthorized third-party applications.
- Developed an interactive link-based demonstration to simulate and visualize silent, unauthorized media access attempts in real-time.

HIGHLIGHTS

- Developed a live security demonstration exposing how malicious applications silently bypass permissions to harvest photos and videos without user consent.
- Hackathon finalist at age 16 — UIDAI National Hackathon 2026.
- Self-taught Linux user with practical command-line experience.
- Discovered and responsibly reported a security bug in an online learning platform.
- Completed Google Cybersecurity Professional Certificate (Coursera).
