ABOUT THE PROJECT

README.md

UTF-8 Markdown

This is a freelance website built for N. Bhana and Sons, a Gujarat-based electrical parts company. It works as a shop portfolio and services catalogue, giving the business a clear and professional presence online so visitors can easily see what the company offers. Main features: a shop portfolio that introduces the business, a services catalogue listing what the company provides, a hard coded HTML and Python build, and a live public version that anyone can open. It is a personal project.
